

Google Classroom

Message Board

Post basic information about the class and upcoming events. Students can comment or ask questions to the teacher and each other.

Assignments

1. Have the students post comments or questions to a prompt.
2. Create a Google form for the students to complete and post the link as an assignment. Their response will be stored in Sheets (spreadsheet) document on your Google Drive. This form can have multiple choice questions as well as short and long answer text. Using an "Add-on" for Sheets called "Fluberoo" you can make the form self grading.
3. Create a document with Google Docs, Sheets, Slides, etc. Attach it to the Assignment. Check the box for "Each student will get a copy." This will allow each student work with the document and to return it to you electronically. You can grade it on the "Student Work" page and also return it to them. Office documents can be uploaded and accessed by students as well.
4. A close reading with annotation can be done using Google classroom. Find a reading and transfer it to a Google document (copy and paste, etc.). Attach it to the assignment. Check the box for "Each student will get a copy."
 - a. When students enter the document, they can:
 - b. Read it
 - c. Type comments that others can read without actually adding text to the reading itself.
 - d. Look up and define tricky words with comments or by typing text into the reading
 - e. Type questions for the teacher or classmates,
 - f. Use the chat feature at the bottom to engage in digital conversation
 - g. Save, share or print the entire experience for access later.
